

Child History

Dharmendra Pal: Age – 20 yrs/M

Dharmendra Pal age 20 years old Boy belonging to a very poor family of H.NO vill bithalpur PO Khamaria Dist. Bhadhoi

His father, Mr.Pandhari Pal is a Farmer. His father works very hard for their daily earnings.

Dharmendra Pal was suffering from the “Right Leg Deformity” (flexion contracture right knee) Due to the poverty his father could not afford for his treatment. As the days passed by, his deformity became a problem for them because he always needed a person to look after him.

In our Survey, we found him in such a pathetic situation and asked him to come in our camp, where doctor suggested him for Corrective surgery to improve his movement with help of physiotherapy and caliper.

We operated him on 17 July, 2014 and we did the release of iliotibial band and release of hamstrings with A/K POP slab.

During operation
